Ruzz

Full-Stack Developer

hello@ruzz.dev · Remote, Worldwide · github.com/ruzz · linkedin.com/in/ruzz

Full-stack developer with 4+ years of experience shipping performant, accessible interfaces and the APIs behind them. Focused on React, TypeScript, and Node.js, with a strong bias toward clean architecture and measurable outcomes.

EXPERIENCE

Senior Frontend Engineer — Northwind Labs

2023 — Present · Remote

- Lead frontend architecture for a B2B analytics suite used by 10k+ teams.
- Rebuilt the design system, cutting UI bugs by 40% and shipping velocity by 25%.
- Drove Core Web Vitals from “needs improvement” to green across all key routes.
- Mentored three engineers and introduced a lightweight RFC process for frontend changes.

Full-Stack Developer — Pixel Forge

2021 — 2023 · Hybrid

- Shipped end-to-end features for early-stage startups, from schema design to production UI.
- Built a multi-tenant billing flow with Stripe that processed $2M+ in its first year.
- Reduced average API response time by 60% through query tuning and caching.
- Set up CI/CD pipelines that took deploys from 30 minutes to under 5.

Frontend Developer — Brightside Studio

2019 — 2021 · On-site

- Delivered 15+ client sites, consistently hitting 90+ Lighthouse scores.
- Introduced a component-first workflow that halved new page build time.

SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Framer Motion, Vite

Backend: Node.js, Express, PostgreSQL, Prisma, GraphQL, Redis

Tooling: Git & GitHub, Docker, CI/CD, AWS, Playwright, Figma

SELECTED PROJECTS

Nimbus — Realtime analytics platform for SaaS teams. React, TypeScript, Node.js, PostgreSQL.

Pulse — Developer API for presence and collaborative state. Node.js, WebSockets, Redis, Docker.

Snippet Vault — Local-first snippet manager with fuzzy search. React, Vite, SQLite.

Orbit UI — Open-source design system and component library. TypeScript, Radix UI, Storybook.
